About The Property

The West homes residential development is a modern urban micro-enclave of four (4) uniquely crafted buildings set in West Legon - Accra's new best address for a sub-urban residential neighborhood. The community of four homes is neatly tucked on a half acre plot with general amenities like a security post that presents 24-hour security for the development, a link road, street lights, side walks, a pre-installed 20kVA genset with an automated transfer switch in addition to a well designed drainage system. All four homes within the development seem to converge at a core which is represented by the main link road at the center. West homes is breathtakingly crafted with modern, sensible features that draw aesthetics, function and technology from end-user experiences of similar developments into its interior and exterior. Each home within this micro-enclave boasts of well shaded long slit windows which reduce the total solar heat gain within every space, properly built doors and interior fenestrations that evoke class and quality. Again, a broad blank wall defines the uniqueness in design of the development. In addition to this, the masonry details added to the exterior of the homes truly offer clients a proper welcoming experience. The interior of every house is sculpted to match hotel class features and reflects the demand of the modern family. From the wooden finish floor tiles to the well furnished open kitchen with a perfect work triangle and the comfort based bathroom designs, the West homes development brings to the client an ultimate sense of quality and satisfaction. The spaces thus hold the guarantee that occupants are well relaxed and live comfortably anytime they come home. The West homes development truly embodies the desire of every modern family to own a beautiful home at a very sensible market price and accomplishes the vision of its developers to spread high quality homes at extreme competitive prices to the Ghanaian family.
